Building U.S. Resilience Against Biological Threats

$9.2M+ | In grants to U.S. research institutions and collaborators to support initiatives to help bolster pandemic preparedness and response.

What do these grants support?

- **PPE**: Expanding access to effective respiratory options and evaluating factors that allow for successful respirator use in emergencies.
- **Far-UVC**: Advancing research to better understand far-UVC's effectiveness, safety, and performance in real-world indoor environments.
- **Glycol Vapors:** Investigating the safety, efficacy, and practical deployment of specific glycol vapors as potential emergency countermeasures.

About Blueprint Biosecurity

Blueprint Biosecurity is a nonprofit dedicated to strengthening society's ability to prepare for and respond to pandemics. We advance practical, pathogen-agnostic solutions through targeted research, strategic grantmaking, and evidence-based policy guidance.
